

CITY OF ALBANY  
Public Works Department

ADDENDUM #1

WC-13-01,  
CANAL DIVERSION STRUCTURES

As required in the Specifications and Drawings under section 1.7, the following inquiries and responses are provided and shall be considered part of the RFP documents.

In order to ensure that all proposers are aware of these provisions, each proposer shall sign this addendum below and attach it to the proposal.

**IMPORTANT: Failure to include a signed Addendum could result in the disqualification of your proposal.**

Date	Question	Answer
6/7/16	Is this an irrigation ditch or part of a drinking water system?	The canal's ultimate discharge is into a drinking water treatment plant that also has hydroelectric power.
6/9/16	Does consultant need to determine the required flows down sloughs?	It is not the consultant's responsibility to determine the flow rate required to be diverted to the sloughs. The City will provide flow rates and the Consultant will design the structure in consideration of those flow rates.
6/9/16	Is permitting the responsibility of the consultant?	Preparing permitting applications and navigating the permitting process for all construction work will be the responsibility of the consultant.
6/9/16	Is there a geotechnical report?	There is no prior geotechnical work that will be provided.
