June 26, 2023

To: All Users of the City of Albany *Standard Construction Specifications*

### **Revised Standard Construction Specifications June 30, 2023**

The City of Albany Public Works Department completed a self-evaluation to identify barriers to accessibility in the right-of-way and a transition plan to remove the barriers. The June 2023 revisions to the *Standard Construction Specifications Standard Drawings* were identified in the transition plan. These revisions are made effective and shall apply to all projects approved for construction. Changes to the City of Albany's Public Works Standards are described in the document: *Summary of Changes SCS – June 2023*.

The most current version of the City of Albany *Standard Construction Specifications* and associated drawings is located on the City's website at <https://www.cityofalbany.net/departments/public-works/engineering/standard-construction-specifications>. The current version of the *Standard Construction Specifications* has "June 2023" in the footer of each page. All holders of this manual should review the attached Summary of Changes and update their manuals.

Sincerely,

Staci Belcastro, P.E.  
City Engineer
